Sir:

This communication is responsive to the first Office Action dated July 17, 2002, concerning the above-referenced patent application.

Please amend the application as follows:

In the Drawings:

A separate Proposed Changes to the Drawings is attached. Copies of the drawing figures showing requested changes in red are submitted with this document.

In the Specification:

- **Delete the second full paragraph at page 4, lines 9-22 and substitute the following paragraph:** (The changes are shown explicitly in the attached "Version With Markings to Show Changes Made.")

An The patient data information system of the present invention also provides a method of integrating patient data from first and second applications comprising displaying a first set of patient data using the first application and generating a patient context for that patient. The patient context from the first application is provided to a second application and
